

1 EXECUTIVE SUMMARY

NBBL is India's unified bill payments platform, connecting billers and customers through interoperable, secure and reliable solutions.

PRODUCT THESIS

NBBL aims to solve the fragmentation, inefficiency and lack of trust in India's bill payments ecosystem by providing a single interoperable network.

KEY INSIGHT

Bill payments are a high-frequency, trust-driven use case where reliability and coverage are more valuable than features.

2 ABOUT NBBL

WHAT NBBL OFFERS

Interoperable Bill Payments

Centralized Infrastructure

Standardized Processes

KEY STAKEHOLDERS

BILLERS
(Utilities, Govt, Enterprises)

AGGREGATORS /
PAYMENT APPS
(PhonePe, Paytm, Banks, etc.)

CUSTOMERS
(End Users)

AGENTS /
CHANNEL
PARTNERS

VALUE PROPOSITION

For Billers

- ✓ Wider reach across channels
- ✓ Faster reconciliation
- ✓ Reduced integration cost
- ✓ Secure & reliable collections

For Customers

- ✓ Pay from any app or channel
- ✓ Multiple payment options
- ✓ Real-time confirmation
- ✓ Consistent experience

3 THE PROBLEM

CURRENT STATE

- ✗ Fragmented biller integrations with multiple platforms
- ✗ Multiple payment experiences & standards
- ✗ Reconciliation delays & manual intervention
- ✗ Payment failures & disputes
- ✗ High operational cost for billers
- ✗ Low coverage in rural & semi-urban areas

HIDDEN PROBLEM

- ✗ Complex onboarding for new billers
- ✗ Inconsistent data standards
- ✗ Limited visibility into payment lifecycle
- ✗ Exceptions handling is manual
- ✗ Lack of real-time insights & analytics

KEY INSIGHT

The core issue is not just payments, it is the lack of a unified, reliable and intelligent bill payments infrastructure at scale.

4 MARKET OPPORTUNITY

₹ 25T+

Annual bill payments market in India

9.3B+

Bill transactions processed annually

600M+

Unique users making bill payments

GROWTH DRIVERS

Digital adoption

Government digitization

Rising utility penetration

Shift to cashless

STRATEGIC OPPORTUNITY

Become the default settlement layer for all recurring and one-time bill payments in India.

FOCUS SEGMENTS

Utilities
(Electricity, Gas, Water, etc.)

Telecom

DTH

Education

Insurance

Govt. Services

5 COMPETITIVE LANDSCAPE

PLAYER

BBPS (NBBL)

Interoperability + Scale

Individual Apps
(PhonePe, Paytm, etc.)

User Base + Distribution

Banks

Trust + Customer Base

Fintech Platforms

Features + UI/UX

Agents / BC Networks

Reach + Cash Handling

STRATEGIC INSIGHT

Apps compete on user experience. NBBL competes on infrastructure scale, reliability and interoperability.

6 PERSONAS

BILLER (Utility Company)

- Goals: Maximize collections, reduce cost, improve reconciliation
- Pain Points: Multiple integrations, high failure rates, delayed settlements

CUSTOMER (End User)

- Goals: Pay conveniently, get instant confirmation
- Pain Points: Payment failures, unclear status, no reminders, poor support

AGGREGATOR / APP

- Goals: Increase successful transactions, reduce drop-offs
- Pain Points: Integration complexity, exceptions, reconciliation mismatches

7 USER JOURNEY + PAIN POINTS

STEP	USER ACTION	PAIN POINTS
1 DISCOVER	User selects biller	Biller not available / hard to find
2 ENTER DETAILS	Enters consumer / biller details	Data format errors, unclear fields
3 VIEW BILL	Fetches bill details	Slow fetch, incorrect bill amounts
4 MAKE PAYMENT	Selects payment mode & pays	Payment failures, timeouts
5 CONFIRMATION	Receives confirmation	No instant confirmation
6 SETTLEMENT	Biller receives funds	Settlement delays, T+N days
7 RECONCILIATION	Biller reconciles data	Data mismatches, manual effort
8 SUPPORT	Raise issue / dispute	No visibility, slow resolution

Every step has a friction that impacts trust and repeat usage.

8 ROOT CAUSE ANALYSIS

LEVEL 1 SYMPTOMS

- Payment failures
- Reconciliation issues
- Customer complaints

LEVEL 2 PROBLEMS

- Fragmented integrations
- Inconsistent standards
- Manual processes

LEVEL 3 ROOT CAUSES

- Lack of unified infrastructure
- Limited automation & visibility
- Exception-heavy operations

ROOT CAUSE

Lack of unified, intelligent and scalable bill payments infrastructure.

9 SOLUTION FRAMEWORK

PILLAR 1: SCALE & INTEROPERABILITY

- Onboard more billers across categories
- Standardized API & data formats
- Expand channel & aggregator network

PILLAR 2: RELIABILITY & AUTOMATION

- Real-time payment processing
- Smart routing & retry mechanisms
- Automated reconciliation & exception handling

PILLAR 3: INTELLIGENCE & INSIGHTS

- Real-time dashboards for billers & partners
- Predictive failure detection
- Actionable analytics & reporting

10 PRIORITIZATION ROADMAP

PHASE 1
(0-6 Months)

STRENGTHEN CORE

Goal: Improve reliability & uptime

PHASE 2
(6-12 Months)

EXPAND COVERAGE

Goal: Onboard more billers & categories

PHASE 3
(12-18 Months)

AUTOMATE OPERATIONS

Goal: Reduce exceptions & manual effort

PHASE 4
(18-24 Months)

INTELLIGENCE LAYER

Goal: Data-driven decisions & predictive insights

11 NORTH STAR METRIC

SUCCESSFUL BILL PAYMENTS AT SCALE

Why this metric?

Reflects adoption & coverage

Measures reliability

Drives customer trust

Impactful for all stakeholders

It captures volume, reliability, reach and trust together.

12 SUCCESS METRICS

GROWTH METRICS

- Total Bill Transactions
- Unique Paying Users
- Active Billers
- New Billers Onboarded

RELIABILITY METRICS

- Payment Success Rate
- Uptime (%)
- Failed Transactions
- Dispute Rate

OPERATIONAL METRICS

- Reconciliation TAT
- Exception Rate
- Auto Reconciliation %
- Settlement TAT

FINANCIAL METRICS

- Transaction Value (₹)
- Take Rate / Revenue
- Collection Efficiency
- Cost per Transaction

Balanced metrics ensure growth with reliability and profitability.

13 KEY RISKS & MITIGATION

RISK	IMPACT	MITIGATION
Payment Failures	Loss of trust, customer churn	Smart routing, monitoring, retry & failover
Reconciliation Mismatches	Operational cost, delayed settlements	Standardization, auto-reconciliation, real-time dashboards
Biller Onboarding Delays	Slower growth	Self-onboarding, simplified APIs & documentation
Security Threats & Fraud	Financial loss, reputation damage	Strong security controls, fraud monitoring, compliance
System Downtime	Service disruption	High availability, DR, continuous monitoring

14 STRATEGIC DIFFERENTIATORS

National Scale
Backed by NPCI's trusted infrastructure

Interoperability
One integration, multiple channels

Reliability
High uptime, secure & robust system

Standardization
Common standards across ecosystem

Data & Insights
Real-time visibility & actionable analytics

NBBL's strength is being the invisible backbone of India's digital bill payments.

15 CONCLUSION

NBBL is building the unified, reliable and intelligent infrastructure that powers India's everyday payments.

The future is not about more apps, it is about stronger infrastructure.

Scale

Interoperability

Reliability

Intelligence

Trust

NBBL = The Backbone of Bharat Bill Payments
