

THE SHIFT TOWARDS CONTEXT-DRIVEN LENDING

From Process-Led Applications to Intent-Led Lending Experiences

1 CUSTOMER EXPECTATIONS ARE EVOLVING

Past

Visit branch

Fill multiple forms

Depend on agents for guidance

Follow fixed application processes

Future

Express intent naturally

Receive instant guidance

Minimal effort, maximum automation

Personalized experiences

Insight

Customers increasingly expect outcomes with minimal effort rather than participation in lengthy application processes.

2 CUSTOMER DATA IS ALREADY DIGITAL

Past

Physical documents

Manual verification

Repeated data collection

Future

DigiLocker

Banking & Account Aggregator Data

Employment & Income Records

GST & Business Data

Existing Customer Relationships

Insight

The future challenge is no longer obtaining customer data. The challenge is intelligently orchestrating data from multiple sources.

3 CONVERSATIONAL EXPERIENCES ARE BECOMING MAINSTREAM

Customers Already Trust Conversations For

Shopping Assistance

Travel Booking

Banking Support

Service Requests

AI Assistants

Traditional Experience

Fill 10+ screens and navigate complex workflows.

Emerging Expectation

"Tell me what information you need and help me get my loan."

Insight

Customers increasingly expect to describe their needs rather than navigate predefined application flows.

4 CUSTOMER CONTEXT IS THE FOUNDATION OF AI-NATIVE LENDING

Sources of Context

Documents

Conversations

Connected Data Sources

Customer Intent

AI Understanding

- ✓ Who the customer is
- ✓ What the customer wants
- ✓ Ability to repay
- ✓ Eligibility likelihood
- ✓ Missing information required

Personalized Lending Journey

Insight

Documents are only one source of context. Future lending journeys combine documents, conversations, and connected data to understand customers holistically.

PROCESS-FIRST LENDING

KEY TRANSFORMATION

CONTEXT-FIRST LENDING

The future of lending is not about collecting more information. It is about understanding enough context to make the right decision with the least customer effort.

1 PROBLEM VALIDATION – CUSTOMER INSIGHT

People communicate differently. Preferences are shifting.

Future journeys must adapt intelligently.

We observed two primary communication preferences that vary based on situation, context and comfort.

TEXT-FIRST (Chat Lovers)

- ✓ Prefer typing & reading
- ✓ Asynchronous
- ✓ Convenient & private
- ✓ Time to think & respond
- ✓ Multi-tasking friendly

VOICE-FIRST (Talk Lovers)

- ✓ Prefer speaking & listening
- ✓ Real-time conversations
- ✓ Seek human connection
- ✓ Quick clarity & guidance
- ✓ Reassurance in important moments

PREFERENCE CAN CHANGE BASED ON SITUATION

People prefer TEXTING when...

- At work / in meetings
- In public places
- When busy or in a hurry
- When information is complex
- When privacy is important

People prefer TALKING when...

- When the topic is important
- When confused / need clarity
- When building trust
- When frustrated or emotional
- When relationship matters

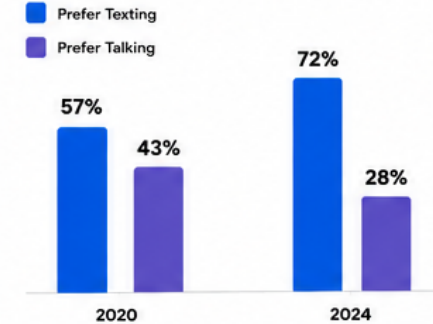

Preference is dynamic, contextual and fluid.

The same person can love talking in one situation and prefer texting in another.

GEN Z IS TILTING TOWARDS TEXTING OVER TALKING

Communication Preference Trend – Gen Z (16–25 yrs)

KEY REASONS

- Digital natives
- Comfort with async communication
- Texting feels less intrusive
- More control over time
- Prefer documenting over conversations

Those digital natives will be the prime lending customers in the upcoming years. Our journeys must adapt to their evolving preferences.

2 EXISTING JOURNEY PAIN POINTS & IMPACT

Journeys are manual, fragmented and rigid – leading to high operational cost and customer friction.

ENTITY / BUSINESS CASES

Files are ready, but journey is still manual

Common documents available

Pain Points

- Manual document coordination
- Repeated follow-ups for missing docs
- Fragmented validation & verification
- High underwriting prep effort
- Longer turnaround time

Impact: Higher TAT, more effort, lower productivity

DSA / DEALER POINT OF VIEW

Files are ready with dealer, still re-collected

Common context already available

Pain Points

- Manual data entry & file creation
- Excel based tracking & updates
- Multiple customer follow-ups
- OTP, document & status coordination
- High operational effort for DSAs

Impact: Lower productivity, higher ops cost

XCL REJECTED CASES

Rejected in XCL due to incomplete / limited data

Opportunity often missed

Pain Points

- Journey stops after rejection
- No intelligent recovery mechanism
- Manual re-processing dependency
- Lost conversion & revenue opportunity

Impact: Lost business, lower conversion

VERIFICATION FAILURE-SCENARIOS

Banking / ITR / GST verification may fail

Verification may fail due to

Pain Points

- Journey pushed to manual handling
- Customer asked to visit branch / resend
- Longer resolution cycle
- High drop-offs during recovery

Impact: Drop-offs, slower recovery, poor CX

WHAT THIS MEANS FOR BUSINESS

- Higher operational cost & manual effort
- Longer turnaround time (TAT)
- Lower conversion & higher drop-offs
- Inconsistent customer experience
- Limited scalability of current journeys
- Missed opportunities in rejected / failed cases

THE CORE PROBLEM: Humans are compensating for journey rigidity.

Existing journeys are document-driven, manually stitched and lack intelligent orchestration across onboarding, verification and underwriting.

THE OPPORTUNITY:

Use AI to understand available context, ask only what's missing, recover rejected cases and run BRE again to generate offer & enable STP – reducing effort, improving speed and increasing conversion.

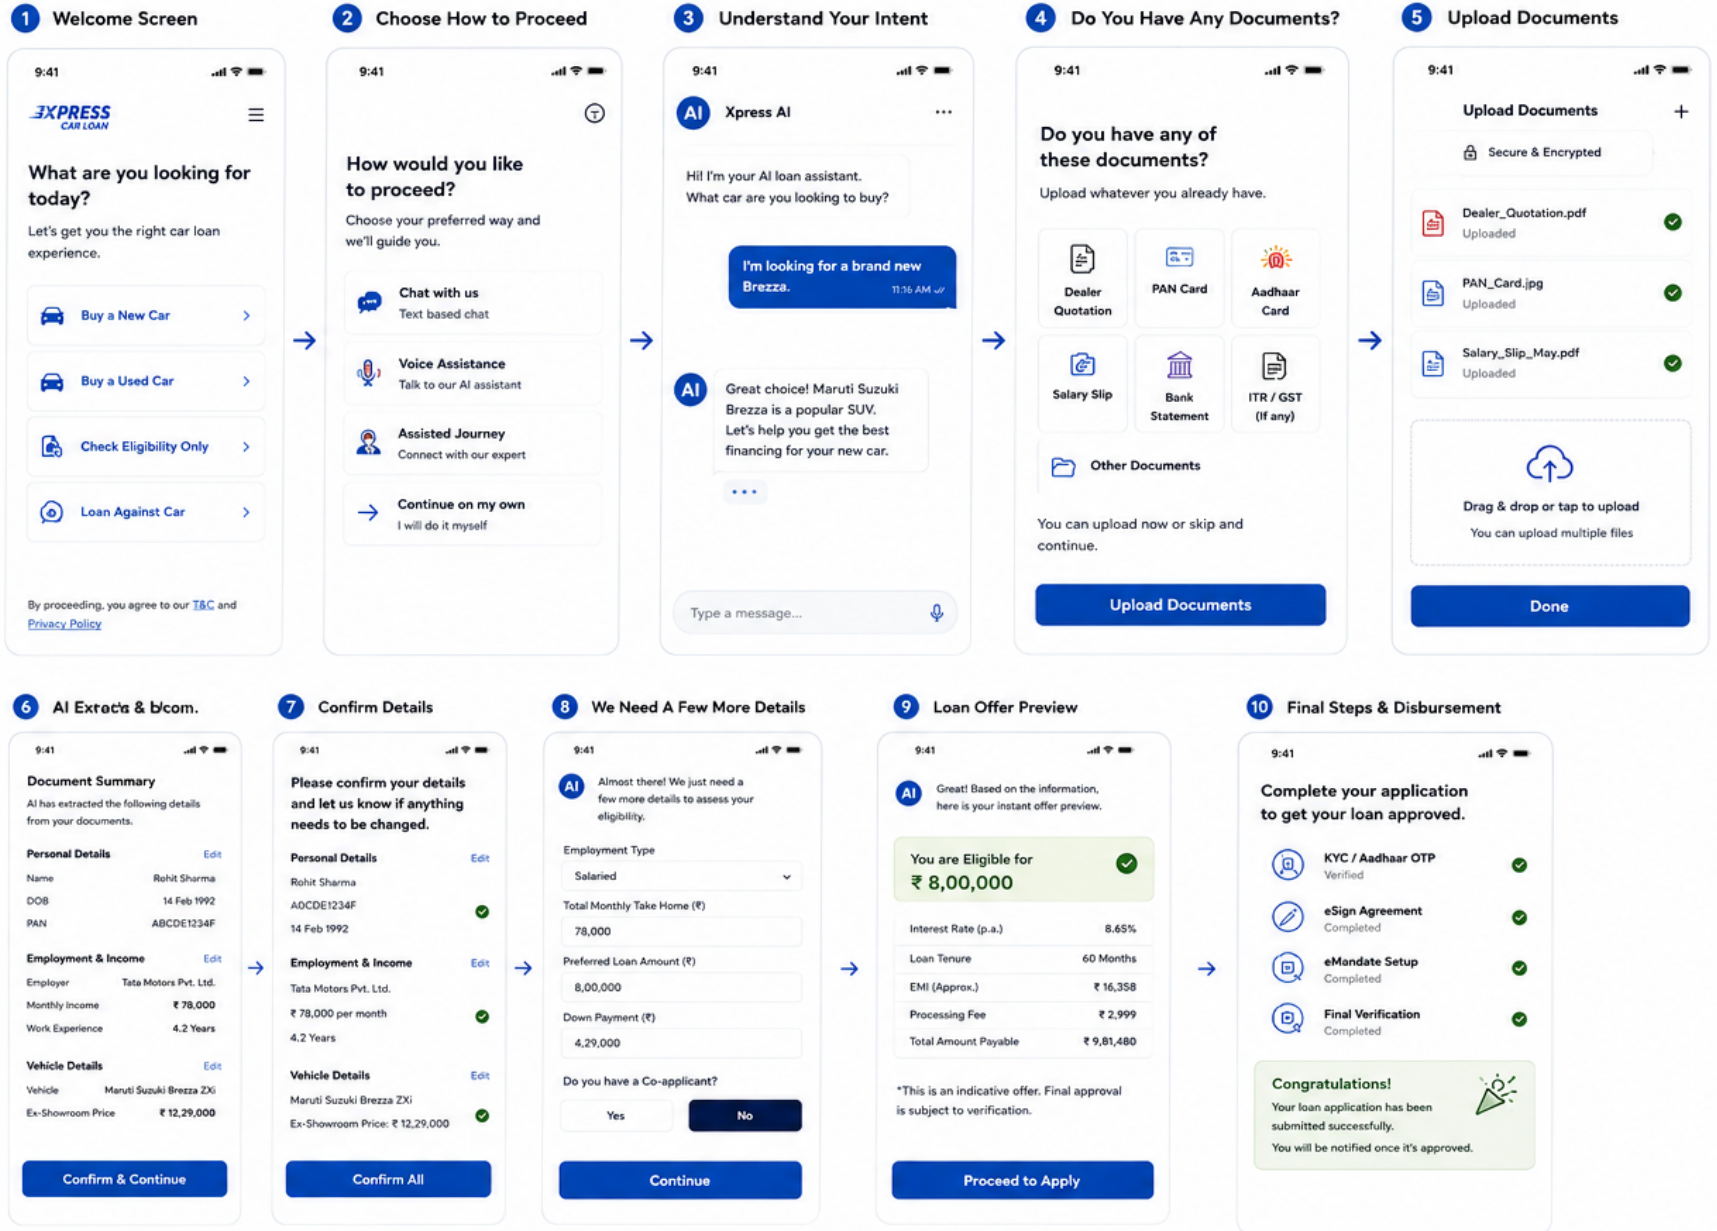

EXPRESS CAR LOAN

AI-Powered. Intent-Led.
Super Fast Car Loan.

Simple steps.
Smarter experience.
Faster approval.

- Minimal paperwork
- Instant understanding
- Faster approval
- 100% Digital

? Why Xpress
Car Loan?

Intent-Led Experience
We start with your goal, not forms.

Upload What You Have
Any doc. Any format.

AI Understands You
Extracts, verifies & builds your profile.

Asks Only What's Missing
No unnecessary questions.

Instant Offer
Get offer in minutes, not days.

100% Digital
Paperless. Secure. Fast.
